# STRUCTURAL ENGINEERING

## Experts in Efficiency

Public and private clients have come to rely upon EVstudio's deep experience in commercial project and construction types. By integrating as a true partner on your design team, EVstudio fully coordinates with all other stakeholders to produce the most cost-effective structural designs without compromising the architecture or the needs of other disciplines.

### WE DESIGN

---

- Steel, concrete, and masonry
- Elevated post tensioned concrete
- Pre-cast and tilt-up concrete
- Mass and heavy timber framing
- Light wood and steel framing
- Slab foundations, including post-tensioned slabs on grade
- Spread footing, drilled pier, and helical pier foundations
- Shoring, soil retention, and retaining walls
- Unique building forms and unusual structural conditions

### SERVICES INCLUDE

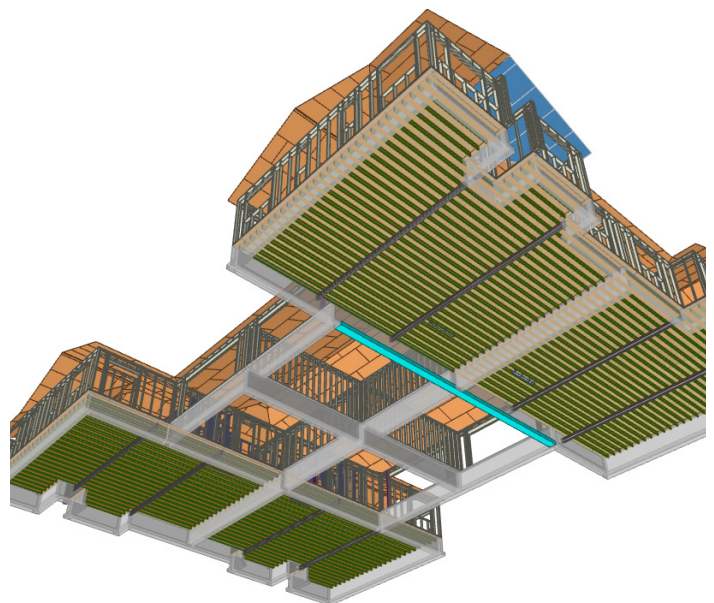

---

- Full Service Structural Engineering Design and Documentation
- Engineer of Record
- Value engineering and efficient designs
- Construction observations
- Structural forensic engineering
- Evaluation and repair drawings
- Engineering reports and detailed documents
- Temporary construction engineering design
- MEP and civil engineering services

### BUILDING SECTORS

---

- |                           |                         |
|---------------------------|-------------------------|
| • Commercial projects     | • Educational buildings |
| • Industrial buildings    | • Assembly spaces       |
| • Multi-family complexes  | • Offsite construction  |
| • Mixed-use communities   | • Hospitality           |
| • Institutional buildings | • Office                |
|                           | • Retail & restaurant   |
|                           | • Medical               |

# OUR STRUCTURAL EDGE

You deserve the best team. Look no further than EVstudio.

## ONE PERSONABLE & COMMUNICATIVE TEAM

You'll work with a dedicated team full of experts who love working with people. We know this is a bold statement for engineers, but we stand by it - we've built a culture of people-oriented, highly communicative professionals that you will genuinely enjoy working with.

## SEAMLESS COORDINATION ACROSS DISCIPLINES

We're already part of an integrated multidisciplinary firm, so we are rigorously trained to integrate with your entire design team and support coordination across all disciplines.

## UNMATCHED RESPONSIVENESS

We understand that time is money and have built our team culture and process workflow around aggressive schedules that you can rely on for your project success. And when urgent issues come up, we'll answer your call.

## PROACTIVE QUALITY CONTROL

Our detail-oriented engineers take care from step one to ensure the highest quality. We have set the standard in the industry for high quality documents allowing easy execution without time delaying RFIs.

## CAPACITY TO PLUG IN WHEREVER NEEDED

With our depth in project experience and variety of construction types, we can be your go-to structural team for all your project needs. We can also cover gaps in scope that may not arise until deep into the process quickly and efficiently.
